

Use the instructions below to help you draw a lyre bird.

Draw 2 Circles. A big circle for the body and a small circle for the head.

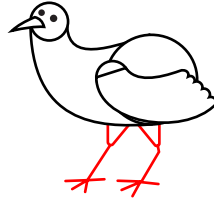

Draw curved lines to form the neck connecting the two circles.

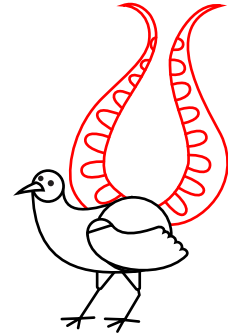

Draw another small circle for the wings.

Draw the wings by drawing curved lines with semi-circle waves at the end. Then draw the beak and eyes.

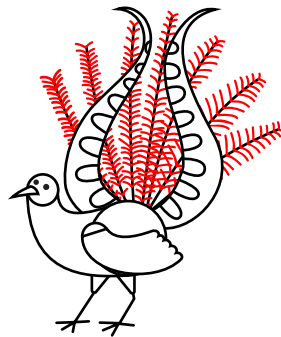

Draw 2 triangles with rounded edges for the legs then lines for the feet.

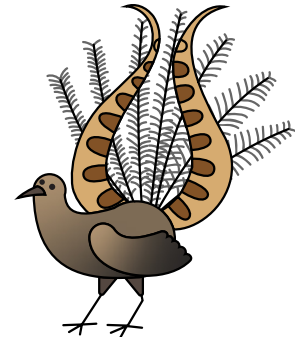

For the Lyrebird's tail. Draw two "S" shapes and half oval shapes inside your "S" shapes for the spots.

Draw lines extending out from the lyrebird's body.

Draw "V" lines from the tip of the new tails. Starting with small "V"s at the top to bigger "V"s at the bottom.

Finalize your lyrebird by outlining it with a pen and erasing the sketch lines then add colour.

Now try drawing your lyrebird below.
